VIDEO TUTORIAL

PIPE CUT. Square-cut the pipe perpendicularly to its axis, using the R990 cutter and taking care not to deform it.

RING INSERTION. Insert the special copper crimp ring onto the pipe.

FITTING POSITIONING. Insert the fitting into the pipe up to the fitting shoulder. Position the crimp ring 3-6 mm from the end of the pipe. Slightly tighten the ring with a pincers in order to avoid its displacements.

CRIMP. Position the crimping tool so that the ring will be completely covered from its jaws. Be sure to keep the tool perpendicular to the pipe axis and close it completely.

CHECK. Check if the crimping has been done properly using the Giacoquest checking gauge GZ211.
